

Infinity and Sensei Plus

Rinnai Infinity PLUS and **Sensei Plus** are custom made water heating solutions that bring together multiple units of our award winning continuous flow water heaters into single, easy to handle modules.

The PLUS system incorporates water heaters, skid systems, pipework and electrical connections providing the complete pre-fabricated turnkey solution. All that is needed are the final connections to the associated services. Infinity and Sensei PLUS have been developed to guarantee the maximum amount of affordable, ecologically friendly, safe and temperature accurate hot water required at any one time by even the most demanding commercial users.

Each PLUS module comprises either two or three Rinnai Infinity or Sensei units and as any number of modules can be manifolded, the capacity is infinite even where demand for instantaneous hot water peaks massively at certain times of the day. The PLUS arrangement also assists with energy and compliance initiatives as the PLUS arrangement maximises system modulation and by smart controls optimises system efficiencies.
