Heating solutions

Space heating

Experience our innovation

Energy efficient and reliable heating solutions

A major problem in heating a church or other large public space is the pattern of usage, and the age of the building. For example they may be heated for a Sunday service, or possibly a mid week meeting. Then there are occasions when heat is required at fairly short notice. The buildings often have high ceilings, and the size and distribution of the occupants can vary from time to time. Rinnai provide a innovative solution to these issues by heating from the floor up and by modulating gas usage in relation to room temperature, enabling Rinnai to provide unparalleled levels of comfort and efficiency.

Widely used in Schools, Community Centres, Conservatories and Churches, Rinnai Fanned Convection powered flue heaters have earned a well deserved reputation and are:

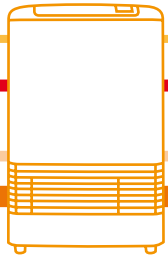

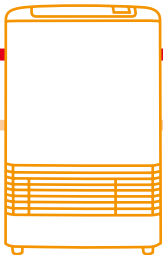

- Quick to warm up
- Easy to control
- Economical to run

They provide safe, controllable heat with maximum energy efficiency, combined with flexibility of location.

- Available for Nat Gas or LPG
- Fully modulating, heat output is reduced as the space temperature rises
- Tiny 80mm flue for a neater finish
- Safer low temperature casing
- Warm air is delivered at floor level for greater comfort and coverage even in large spaces
- Time controlled for added economy

All Rinnai Wall Heaters are fitted with:

- Flame failure protection
 - Automatic ignition
 - Fan assisted flue
- Stainless steel heat exchanger
 - Integral air filters
 - Flexible flue extensions

Rinnai 556T, and 1004T Heaters are also:

- Suitable for central timer control

Rinnai 308FTR:

- Infra-red remote control (On, Off, temperature Up or Down)
- 24 hour digital dual timer with intelligent features
- Self diagnostic
- Self learning pre heat time

Full range of ancillaries including flues guards and timers are available on request - 01928 531870

The range

Rinnai 1004T

Rinnai 556

Rinnai 308FTR

Rinnai 1004T

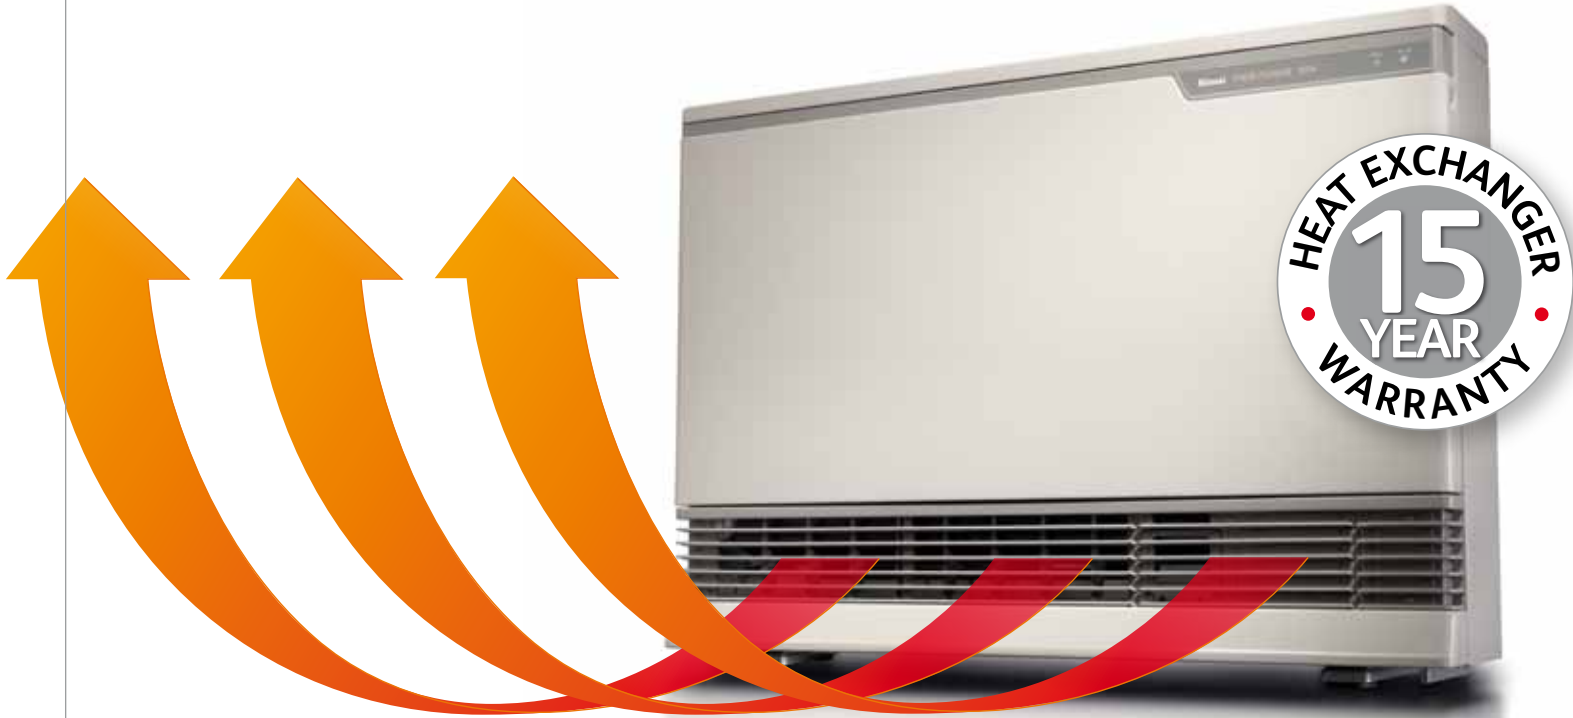

Input	11.6kW/39,780 Btu/h
Output	10.23kW/34,900 Btu/h
Height	670mm
Width	930mm
Depth	315mm
Standard Flue	240mm - 400mm
Alternative flues to fit walls	5mm - 1000mm
Flue hole diameter	80mm

Rinnai 556

Input	6.4kW/21,837 Btu/h
Output	5.2kW/17,742 Btu/h
Height	554mm
Width	750mm
Depth	250mm
Standard Flue	240mm - 400mm
Alternative flues to fit walls	5mm - 1000mm
Flue hole diameter	80mm

Rinnai 308FTR

Input	3.5kW/11,942 Btu/h
Output	2.92kW/9,963 Btu/h
Height	680mm
Width	425mm
Depth	165mm
Standard Flue	240mm - 400mm
Alternative flues to fit walls	5mm - 1000mm
Flue hole diameter	80mm

Rinnai fanned convection heaters are designed to be controlled by a central clock or can be operated manually
